About Me

Passionate and curious Engineering student specializing in Artificial Intelligence and Machine Learning. Skilled in Python, data analysis, and model development, with a strong interest in building intelligent systems that solve real-world problems. Eager to gain hands-on experience and contribute to innovative tech-driven projects.

Skills

- Programming: C, Python, Java
- Web Development: MERN Stack
- Core Skills: Problem Solving, Model Development

Education

- Bachelor of Engineering**
BMS Institute of Technology 2023 - 2027
Bachelor of Engineering in Artificial Intelligence and Machine Learning
Current CGPA : 9.49
- Pre-University[PCMB]**
Vivekananda Pre University College 2021 - 2022
Secured Percentage : 95.5

Projects

- MendiFy | AI, Groq, ML model**
An AI-powered platform designed to support teen mental health through features like a mood tracker, journaling assistant, and online AI tutor. Integrates Groq AI for personalized emotional support and academic guidance, encouraging self-awareness.
- MedWell 360 | OCR, AI, Digital Health Records**
A smart healthcare solution that converts handwritten or printed prescriptions into digital format using OCR and AI. Enables secure storage, easy access, and sharing of medical records for patients and doctors, improving healthcare accessibility and continuity.
- AccessMap | ML, Geocoding, Accessibility, Social Impact**
An inclusive map platform that uses machine learning models to analyze locations for accessibility. Helps people with disabilities explore places confidently by recommending wheelchair-friendly routes, barrier-free zones, and safe environments based on crowdsourced and real-time data.

Achievements

- Participated in 3+ virtual hackathons
- Final Round participant in HackOrbit hackathon over 800+ participants
- Selected for Amazon Bootcamp over 2000+ students** 2025
