## EDUCATION

Bachelor's of Engineering  
BMS Institute of Technology  
2027

## TECHNICAL SKILLS

- Languages: Python, C++, Java, JavaScript
- Web Development: HTML, CSS, React, Node.js
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, VS Code,
- Others: Data Structures, OOP, REST APIs

## CERTIFICATIONS

Introduction to GenAI with AWS  
Udemy  
2025

AWS Educate Machine  
Learning Foundations  
Amazon web services  
2025

## PROFILE

Passionate and curious Engineering student specializing in Artificial Intelligence and Machine Learning. Skilled in Python, data analysis, and model development, with a strong interest in building intelligent systems that solve real world problems. Eager to gain hands-on experience and contribute to innovative tech-driven projects.

## ACADEMIC PROJECTS

### Access-Map | ML, Geocoding, Accessibility, Social Impact

Academic Year | 2025

- Built ML models to detect ramps and stairs from images for accessibility mapping.
- Used OpenStreetMap and geocoding APIs to suggest wheelchair-friendly routes.
- Added crowdsourced reports and NGO-managed zones to improve map accuracy.

### Federated learning for privacy preserving breast cancer diagnosis

Academic Year | 2027-Ongoing

- Built a federated learning model to detect breast cancer from medical images without sharing patient data.
- Improved diagnostic accuracy using distributed model training across multiple data sources.
- Ensured data privacy and security while maintaining high model performance.
